Ayush Agrawal

Pune, Maharashtra

Contact no.- +91 91756569868 **emailsforayush@gmail.com** **LinkedIn**

EDUCATION

G.H Raisoni College of Engineering and Management **Aug 2023 – May 2027**

B.E. in Information Technology (CGPA: 8.44) *Pune, India*

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Development, Operating Systems

SKILLS

Languages: HTML,CSS,C++, JavaScript, Python
Frontend: React.js, TailwindCSS, Responsive Design
Backend: Node.js, Express.js, Authentication
Databases: MongoDB, MySQL, Database Design **Other:**Git, Github

PROJECTS

Spendyzer (Full-Stack Expense Tracker & Analyzer) Github

- Developed and deployed a full-stack personal finance application, Spendyzer, featuring real-time expense tracking, categorization, and spending analytics.
- Implemented **a** scalable architecture utilizing TypeScrip**t** for both the client and server to ensure type safety and code maintainability.
- Designed and managed the database schema using Drizzle ORM to facilitate efficient CRUD operations for user expenses, categories, and financial data.
- Incorporated data visualization features to present expense trends and budgeting insights to the user, enhancing financial decision-making.

SecureCode | MERN Stack, Gemini API

- Built an AI-powered code review platform utilizing Google's Gemini API for automated code analysis
- Implemented secure file handling, code submission workflow, and vulnerability detection system
- Designed intuitive UI for code upload, review management, and security recommendation display

ACHIEVEMENTS

Competitive Programming – Solved 100+ problems across LeetCode, Codeforces, CodeChef, and GeeksforGeeks, consistently honing algorithmic problem-solving skills through regular practice.

COMPETITIVE PROGRAMMING

Codeforces : Participated in multiple contests, solving diverse algorithmic problems.

Codechef : Solved problems across various difficulty levels, enhancing problem-solving skills.

Leetcode :(100+ Questions Solved) – Focused on Data Structures and Algorithms, improving coding efficiency.
